

Jaspersoft Customers, Partners and Community,

I am very pleased to inform you that today TIBCO Software announced it has acquired Jaspersoft Corporation, effective immediately.

TIBCO is a \$1B+ global leader in infrastructure and business intelligence software, headquartered in Palo Alto, California – not far from Jaspersoft's headquarters in San Francisco. TIBCO's presence in the business intelligence market is primarily through the Spotfire product line, which provides visual analytics and data discovery capabilities.

Jaspersoft's strengths in embeddable reporting and analytics and its leading position as a value champion for mid-market BI (both on-premises and in the cloud) are highly complementary to TIBCO. So as a combined company, we look forward to beginning this next phase together where we will work to satisfy the broadest set of analytic software needs.

In fact, we expect that our combination of strengths will create a new leader in BI with one of the most diverse product portfolios in the industry, able to support a wide set of analytics use cases. We expect that our customers and partners will directly benefit from this combination.

To help answer the inevitable questions from a merger of this type, some additional details follow:

- **Corporate Structure:** Jaspersoft is no longer an independent company, but is now a product group within TIBCO
- **Our Name:** The Jaspersoft product brand will continue on as a part of the company TIBCO Software Inc.
- **Our Team:** Jaspersoft employees will continue the Jaspersoft vision as a part of TIBCO
- **Systems & Processes:** Gradually during the next few weeks and months, Jaspersoft will convert some of its systems and processes over to TIBCO. As we do so, we will notify you of any changes this may require in our work with you, and we'll endeavor to make these changes as seamless as possible.
- **How we do Business:** All subscription software license and services agreements, customer support, outstanding price quotes and our current pricing model are unchanged. Overall, Jaspersoft's commitment to offering the highest value reporting and analytics product line in the industry is only amplified by this acquisition. We will continue to support our more than 400,000 community members through our open source offerings.

- **Customer Support:** For commercial customers and partners, your existing support contract is unchanged – same terms, same service level agreements and support team.
- **Product Roadmap:** Jaspersoft’s product team continues to execute on its current product roadmap. In fact, we’re hard at work on a new release coming soon that we think you'll be very excited to learn about.
- **Websites:** [Jaspersoft.com](http://Jaspersoft.com), [community.jaspersoft.com](http://community.jaspersoft.com), and our support portal all continue to be a valuable resource to the Jaspersoft community.
- **Offices:** All Jaspersoft offices remain open and unchanged. There are no facilities changes currently planned as part of the acquisition.

As we make progress as a division of TIBCO, we'll share more information during the coming months. For now, I'd like to emphasize that you should expect little change and a strong continuation of our commitment to you as our customer, partner or community member.

On behalf of the whole Jaspersoft team, thank you for your business and continued support. We'll be working hard to make sure our products and services continue to meet and exceed your expectations..

For more information, please view the [press release](#) on our website.

I'd love to hear from you if you have any questions or comments, please send them to [questions@jaspersoft.com](mailto:questions@jaspersoft.com).

Thank you and best regards,

Brian Gentile

Formerly Chief Executive Officer Jaspersoft Corporation

now General Manager, Jaspersoft product group at TIBCO Software
